Claims 1-44,48-79 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

It is noted that in claim 45, line 2 "of a compound of having" is ungrammatical.

Also, in claim 47, line 3, "of a compound of having" is ungrammatical.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: each limitation of claims 45-47 do not appear to have proper antecedence in the instant specification. Antecedent support for originally filed claims may be inserted into the specification.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 45-47,80 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 45, "151" is new matter.

Art Unit: 1754

In claim 47, "163" is new matter.

In claim 47, penultimate line, "less than" is new matter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Claims 45-47,80 appear allowable over the cited prior art of record.
